ACCPAC®

ACCPAC Corporate Series

Seagate Crystal Info

Today, every bit of unused information is a loss of competitive advantage. Yet despite all the data collected, somehow even simple facts are still hard to find.

Seagate Crystal Info for ACCPAC Corporate Series™ provides everyone in your company with access to critical business information so they can make smarter, more profitable decisions everyday. It includes award-winning reporting from Seagate Crystal Reports and time-tested analysis technology from Seagate Holos. These capabilities help you become more productive since you gain immediate access to shared reports and business knowledge online. Seagate Crystal Info even works from a Web browser, so information can be accessed whenever, wherever.

A Comprehensive and Integrated ACCPAC Solution

Seagate Crystal Info is tightly integrated with ACCPAC® products, providing an ideal solution for managing your data using ACCPAC software. A single license of Seagate Crystal Info is included with ACCPAC Corporate Series System Manager. For fast answers to your business questions, ACCPAC also includes more than 100 pre-defined Crystal Report templates.

Share Information Among Diverse Users

Not all people in your organization have the time or possess the skills necessary to design a report, yet most still need access to this information. Seagate Crystal Info helps you leverage the power of Seagate Crystal Reports throughout your entire organization by enabling those who create reports to share them with others easily and securely. All types of users, no matter which department or workgroup they are in, can quickly and easily view, schedule and analyze shared reports, OLAP cubes and other critical business information.

Distribute and Share Reports Over the Web

ACCPAC users can share reports over the Web as an information distribution mechanism. Seagate Crystal Info interfaces seamlessly with the Web and intranets—providing a zero-administration, cost-effective application distribution platform. You and your remote users can securely access reports, and analyze multi-dimensional data cubes using Web browsers from anywhere in the world.

Use the powerful Info Report Designer to design ad hoc reports with more than 85 customizable graph styles.

Create Presentation Quality Reports Quickly and Easily

Seagate Crystal Info includes the award-winning technology of Seagate Crystal Reports. Easy-to-use report experts walk you through the design process from start to finish, creating professional-looking reports in minutes! You can create an unsurpassed range of richly formatted reports such as columnar reports, form style reports, mailing labels, subreports, conditional reports, cross-tab reports, multiple section reports, Top N reports and drilldown reports.

Deliver Advanced Ad Hoc Analysis Power to Those Who Need It

Sometimes report analysis spawns new business questions, and business analysts need access to technology that lets them explore their data quickly and easily. If you require additional ad hoc capabilities, you can access the world-class Online Analytical Processing (OLAP) technology of Seagate Holos inside Seagate Crystal Info for ACCPAC. Using Seagate Software's OLAP technology, you can create multi-dimensional views of your data to explore inherent trends and relationships.

### Customizable and Automated Scheduling for Hassle-Free Report Processing

Save time by taking advantage of Seagate Crystal Info's robust scheduling capabilities and begin to experience the freedom of unattended processing 24 hours a day! Schedule reports to run when you want them to, based on time or events including: on a recurring basis, based on a data warehouse update or after regular business hours.

Minimize Network Traffic

If you have multiple users creating and running similar reports, your network is putting in a lot of unnecessary overtime. With Seagate Crystal Info, redundant reporting and queries are eliminated. By publishing results in shared folders, result sets are stored centrally and re-accessed on demand by the user.

Built-in Security Ensures Confidentiality and Control Over the System

With Seagate Crystal Info, there's no need to worry about the wrong people getting access to confidential information. Seagate Crystal Info's built-in security helps you ensure the *right* people get access to the *right* information. You decide which users and groups can access, view, modify, design and delete information.

Seagate Crystal Info for All Your Reporting and Analysis Needs

Empower more people in your organization with the ability to share and analyze reports. With a special version of Seagate Crystal Info within ACCPAC, only one user can experience the benefits of reporting and analysis. Share the power to distribute reports with everyone who needs access to decision-critical information. Special upgrade pricing is being offered to ACCPAC users to purchase additional licenses of Seagate Crystal Info.
