

## Report Writer

powered by Foxfire!®

Unlock the data in your Pro Series accounting system. Use our award-winning product to create custom queries and reports with your Pro Series data-fast and easy, without programming.

### Features of Report Writer

- Create reports from Pro Series data
- For all skill levels:
  1. Practical user, familiar with Pro Series, but not FoxPro®
  2. Power user, comfortable with FoxPro but not a programmer
  3. Programmer
- Create three types of reports:
  1. Detail reports that display a line for each selected record
  2. Summary reports that summarize and calculate information for groups of selected records
  3. Cross-tab reports that show other relationships between two data items in a spreadsheet-like format (e.g. a sales report that shows total sales for salesmen by month)
- Send results to printer, screen, or file. File types include:
  1. Spreadsheet (Microsoft Excel, Lotus® 123)
  2. Mail merge (Microsoft Word, WordPerfect®)
  3. ASCII (fixed length or delimited)
  4. Database (FoxPro, dBase, Clipper, FoxBase)
- Create labels
- Save reports for future use
- Use the current or history files or both. When both are used, duplicate records are removed automatically
- Create multiple company reports
- Includes Pro Series data dictionaries
- Five easy steps give you instant reporting:
  1. Name and describe your report
  2. Choose any data items (fields) from multiple tables
  3. Define the record filters, sort order and group breaks
  4. Choose the format of your report results (report, label, browse window, graph, spreadsheet or file)
  5. Run the report: Preview on-screen, adjust the layout, then print, for a perfectly formatted report the first time
- Help available at any time with the F1 key
- Display the SQL (structured query language) for the report with a keystroke
- Display a record count for the report
- Ability to create reports from non-SBT® data
- Includes utilities to customize the report template, modify report layouts and custom data sets, etc.
- Security and access privileges are smoothly integrated with System Manager

## Report Writer
